

Advice for business start ups

Our business start-up consultation is tailored to your needs. During a free initial consultation we would discuss your project and work together with you to define what is necessary to your business success. Some of the matters for a business start-up may include:

- Check-up: Is the business idea really promising?
- Creation of a professional business plan
- Advice on basic administration (company registration, types of legal forms required, accounting, etc.)
- Advice on tax and accounting matters
- Clarification of legal issues
- Grant and subsidy advice (What kind of state support is available to you and how can you apply for it?)
- Developing a professional capital estimate (How much money do you really need to begin successfully?)
- Assistance with applications for start-up loans
- Preparation of sales forecasts (What sales are to be expected in my industry?)
- Professional profitability and liquidity planning
- Determination of corporate values for company acquisitions
- and much more ...
